ABSTRACT (11 Font Size, bold, all caps, centered)- Abstract should be written in 200 words and with 10 font size, Times New Roman, justified, single line spacing. Objectives, methods and findings are summarized in this section.

Keywords: Keywords regarding the work are stated in this section. Said section should contain maximum 5 words that are written with 10 font size and separated with semi-colon.

1. INTRODUCTION (Title Times New Roman, 12 font size, bold)

Extended abstracts should be written according to underlying structure of the structured abstract and in a form that is shorter than the full text (the original text in Persian). Subtitles of the extended abstract should be composed from the sections of **abstract and keywords, introduction and objective, method, findings and argument (if any), conclusion and suggestions (if any)**. Extended abstract of the full paper shall be written with Times New Roman font, single line spacing and 11 font size. Extended abstracts can contain figures, tables, formulations or images extracted from the original paper in Persian. Extended abstracts should be in a structure that explains the content of the declaration therefore the preparation phase of the said work. Page margins are formed regarding the A4 page size. End of the lines should be aligned to the right and there should be no syllable segmentation. **Extended abstracts should not exceed 3 pages including the references** and pages should not be numbered English extended abstract should be presented in single column. (چکیده گسترده انگلیسی به صورت تک ستونه ارائه شود)

Current literature regarding the work subject should be examined and the differences of the said work from the past, similar works should be presented clearly in the introduction section. (All the items in the Section of "References" should be referred to in the text - if necessary, in a compact writing style).

2. MATERIALS AND METHODS

All materials and methods that have been used in the work must be stated clearly and subtitles should be used when necessary. In the case of presenting equations and mathematical relations, they must be numbered consecutively throughout the text (regardless of the Section number). A pair of parenthesis must be used for each equation number. For instance

$$Ax = b \tag{1}$$

Note: For the tests of which results are detailed in this abstract, the characterization methods used must be mentioned in this section.

2.1. Subtitle

First degree titles (2.) should be written left aligned, all caps and bold. Second and 3rd degree subtitles (2.1, 2.1.1) should be written left aligned, bold and with title case. A blank line should be placed between the paragraphs and there should not be any paragraph indentation.

3. RESULTS AND DISCUSSION

3.1. Subtitle

All of the tables, images and figures should be centered (even if there is more than one figure in a line). Figures and images should be numbered together (Figure 2) and figure definitions should be placed under the figure or image; as for the tables, they should also be numbered (Table 2) and the table header should be placed at the top of the chart. Table, image and figure headers should be written with upper case initial letters, bold and should be centered. References (if any) of the tables, figures and images should be presented just under the tables, figures and images in the form of author surname and publication date (see Table 2 below).

(مجموع شکل‌ها و جدول‌ها نباید بیش از یک سوم کل چکیده باشد)

3.2. Subtitle

The subtitles must be arranged according to the content of the original paper in Persian.

Table 1. Table Header

4. CONCLUSION

Please conclude your work incorporating your most important finding as well as future works (3-4 lines). The information conveyed by the extended abstract SHOULD NOT BE different from that conveyed by the original paper (in Persian).

ACKNOWLEDGEMENT

Please acknowledge your research grant, organization, scholarship (where relevant).
